

Project Valorous Floating Offshore Wind Farm

Notice to Mariners

NtM Number	Valorous/001 v6.0
Date of Issue	09/12/2021

1 Planned Activity

Deployment of Floating LiDAR

Possible Retrieval and Redeployment of Floating LiDAR System

Unfortunately, communication has been lost with the Floating LiDAR System located within the proposed Valorous Floating Offshore Wind Farm (FLOW) project site.

There is a concern the Floating LiDAR System has capsized or has broken free of its mooring system during Storm Barra. As such it represents a potential hazard to mariners.

Preparations are being made to visit the site as soon as possible and when sea conditions are safe to do so.

The latest known position of the Floating LiDAR, which is the original deployment location is provided below:

- 51°20.659' N, 005°40.694' W¹

Details of the device and relevant Aids to Navigation are provided below.

Floating LiDAR

Yellow in colour

Yellow 'X' shaped topmark

Fl (5) Y 20s light (5nm range)

Flash rate not exceeding 30 per minute.

MMSI Number: 992351335

2 Geographic Co-ordinates (UTM 30 / WGS 84)

Latest known position of the Floating LiDAR Location

Degrees Decimal Minutes	51°20.659' N	005°40.694' W
Degrees Minutes Seconds	51°20'39.57" N	005°40'41.69" W

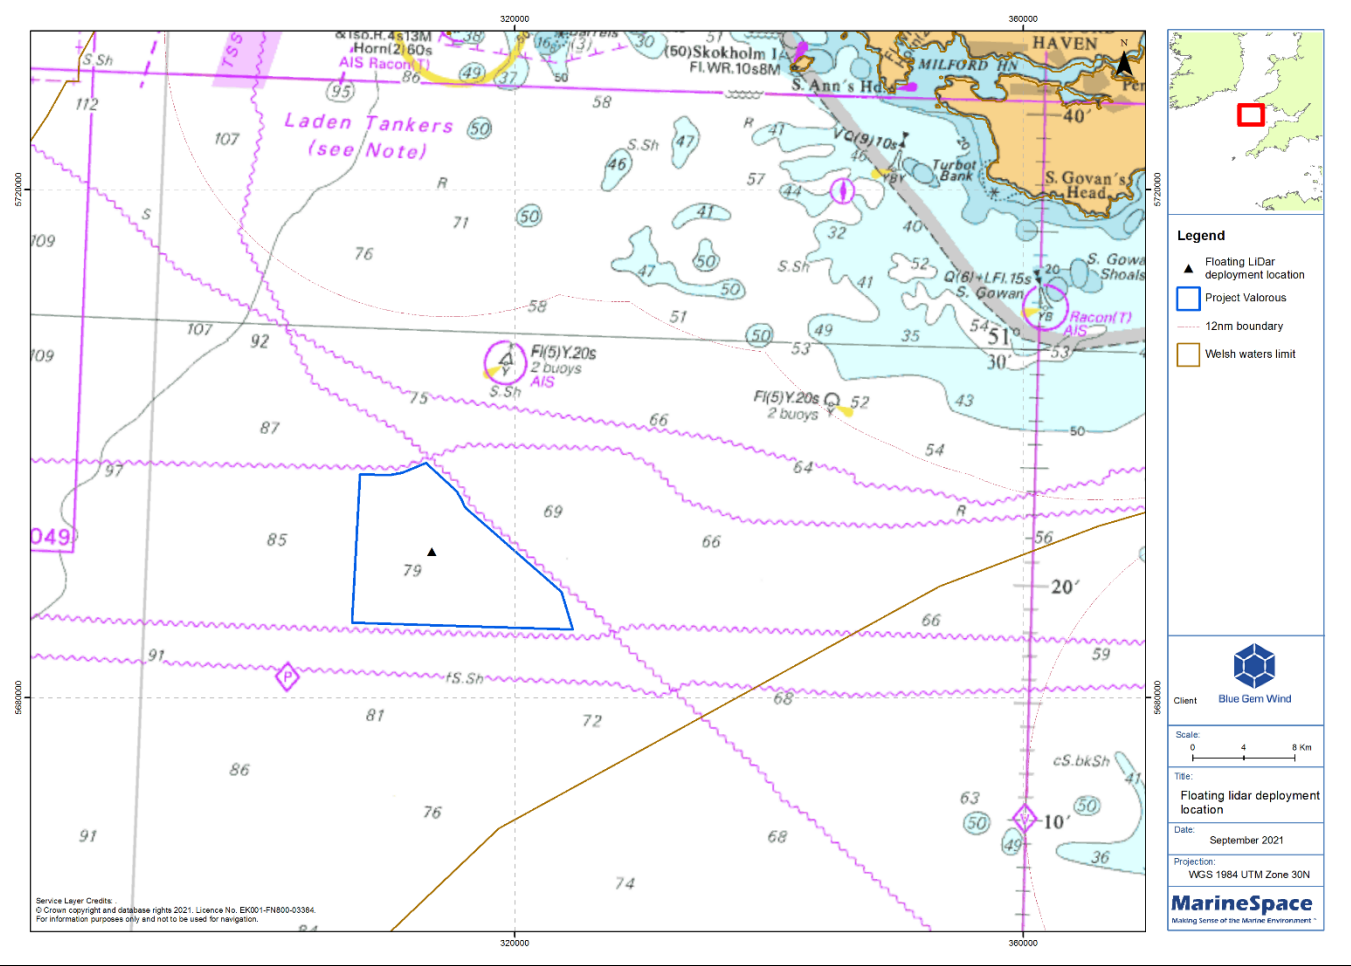

3 Safe Clearances, Navigation Safety Features and Safety Notes for Mariners

All vessels are requested to always maintain a safe distance (100m) from the possible capsized or drifting Floating LiDAR.

¹ Please note within the previous Notice to Mariners (Valorous/001 v5.0) the deployment location was confirmed as 51° 20.641' N, 005° 40.714' W. This was incorrect and it should have been the coordinate provided above (51°20.659' N, 005°40.694' W).
